ABOUT ME

I am a bachelor's graduate in Computer Science and currently pursuing a Master's degree in Artificial Intelligence, with strong programming skills and experience in developing Machine Learning and Deep Learning solutions.

I have worked on AI model implementation, applying Natural Language Processing and Computer Vision techniques, and developing full-stack software and web applications.

I have a strong background in Python, C, and Java, with a problem-solving mindset and the ability to collaborate effectively in technical team environments. I quickly adapt to new contexts, a skill strengthened through years of volunteering experience.

WORK EXPERIENCE

Sensiva srl – Bologna, Italy

AI Developer

[2026 – Current]

- **Development and integration** of intelligent vision solutions for industrial robotic arms to enhance autonomous operations.
- **Design** of computer vision algorithms for real-time object detection, localization, and spatial awareness.
- **Optimization** of deep learning models for high-reliability performance on noisy, real-world sensor data.
- **Implementation** of autonomous decision-making modules to increase task efficiency and system intelligence.

University of Ferrara – Ferrara, Italy

Artificial Intelligence Engineer - ArchivIA

[07/04/2025 – 07/10/2025]

Design and implementation of a computer vision model using transfer learning on a pre-trained neural network for the recognition of points of interest at the University of Ferrara, with the development of a complete web application (backend and frontend) to provide the user interface.

University of Ferrara – Ferrara, Italy

Data scientist

[04/2024 – 09/2024]

Internship at the University of Ferrara focused on developing a Machine Learning model aimed at predicting the failure of clinical trials. The dataset used was large and included numerous clinical studies with unstructured textual descriptions. Implemented Natural Language Processing (NLP) techniques and developed an LSTM neural network for predictive model.

PRIVATE CLIENTS – Bologna, Italy

Web developer

[08/2023 – Current]

Design and development of custom websites for private clients, managing the entire project lifecycle. Responsible for UI/UX design, frontend implementation, backend architecture, database management, and deployment of interactive and multimedia web applications.

University of Ferrara – Ferrara, Italy

Enrollment Support

[07/2023 – 12/2023]

Provided back-office support for online enrollment procedures and managed institutional databases.

EDUCATION AND TRAINING

Second Cycle Degree in Artificial Intelligence

University of Bologna [11/2024 – Current]

Country: Italy | Website: <https://corsi.unibo.it/2cycle/artificial-intelligence> | Level in EQF: EQF level 7

Bachelor's Degree in Computer Science

University of Ferrara [12/2021 – 10/2024]

City: Ferrara | Country: Italy | Website: <https://corsi.unife.it/informatica> | Level in EQF: EQF level 6

Scientific High School Diploma

Liceo Scientifico Antonio Roiti [09/2016 – 06/2021]

City: Ferrara | Country: Italy | Website: <https://www.liceoroiti.edu.it/> | Level in EQF: EQF level 5

PROJECTS

[2026 – Current]

Rizzoli AI - Turni Full-stack design and development of a web application for automated shift and staff management, with multi-role authentication at the Istituto Ortopedico Rizzoli in Bologna, Italy. The backend relies on department-level authorization, and data persistence. The system integrates a deterministic algorithm for automated monthly shift generation with contractual constraints and staff rotation cycles, and an AI assistant for natural language shift management. Winner of best poster award at a national nursing conference (May 2026).

[11/2025 – 02/2026]

Aegis Design and development of a cybersecurity ecosystem aimed at protecting digital media from unauthorized distribution. The system implements a forensic steganography engine capable of embedding invisible, non-repudiable signatures. Resilience against aggressive manipulation, such as cropping, compression, or geometric attacks, is achieved through a proprietary algorithm combining Discrete Cosine Transform (DCT) with Spatial Redundancy (Tiling) and a Grid Search recovery system. The architecture integrates a cross-platform mobile application for secure transmission and a Python backend based on Security-by-Design principles and Zero Trust protocols.

[07/2025 – 09/2025]

Data Preparation and Cleaning for Experimental Acoustic Analysis

- Assisted in the preprocessing and cleaning of large-scale acoustic datasets to ensure data quality and consistency, and contributed to the preparation of structured datasets for subsequent machine learning analysis.
- Gained experience in handling unstructured audio data and applying standard data science practices.

[04/2024 – 09/2024]

ML and NLP Techniques for Predictive Analysis of Clinical Trial Failures

- Developed a machine learning model to predict the failure of clinical trials, using a large-scale dataset.
- Applied Natural Language Processing techniques and implemented an LSTM neural network to build an effective predictive model.

PUBLICATIONS

[2025]

MAIA (Moodle AI Assistant) Co-authored a paper on MAIA, a project focused on developing an intelligent assistant for the Moodle e-learning platform. The agent is capable of not only understanding user requests in natural language but also executing administrative actions, such as creating courses or managing enrollments. The system was built as a native Moodle block with a secure architecture that guarantees data integrity and respects user permissions, aiming to reduce the administrative workload for educators and enhance platform autonomy.

LANGUAGE SKILLS

Mother tongue(s): Italian

Other language(s):

English

LISTENING C1 READING C1 WRITING B2

SPOKEN PRODUCTION B2 SPOKEN INTERACTION B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Experience in MATLAB, python, and R / Python / Java / C/C++ / Assembly / Linux / Windows / iOS / Microsoft Office / Git / Coding and Analytical Skill / Machine Learning / Deep Learning / natural language processing / Computer Vision / implement front-end website design / HTML/CSS / React / PHP, javascript / SQL

DRIVING LICENCE

Driving Licence: B

VOLUNTEERING

[25/10/2025 – 30/10/2025] Bologna

ECAI Volunteer Volunteered at ECAI, Europe's premier conference on Artificial Intelligence, a major international event with participants from academia and industry worldwide.

[03/2017 – 09/2021] Ferrara

Activity Leader My role started with handling registrations, where I took care of processing personal data, managing payments, and ensuring that all information was handled securely and accurately. I was also responsible for planning and running games and activities. I maintained a safe and positive environment, overseeing the children throughout the day and taking responsibility for their well-being during all activities.

In accordance with Regulation (EU) 2016/679 of the European Parliament, dated 27th April 2016, I hereby consent to the processing and use of my personal data provided in this CV and application for recruitment purposes.

Bologna, 26/03/2026

Chiara Sivieri
